

TS11 Safety Notice

RE: Robertshaw TS-11 Thermal Safety Valve Voluntary Recall Program.

Please Read Carefully and Then Check Your Equipment

The TS-11 is a common component used by manufacturers throughout the Foodservice Industry for the safety of commercial cooking equipment. Robertshaw TS-11 gas valves are used in various Montague products involving applications consisting of the range oven for Legend and Grizzly series ranges, and the griddle for the series of deluxe griddles. The voluntary recall applies to all TS-11 safety valves produced between February 2003 and August 2004. These valves can be identified by date codes 0306 through and including 0432.

The date code can be found on a white label affixed to the backside of the housing, below the red button.

The list of the models and/or model prefix's which may be impacted by the affected TS-11 valve supplied by Robertshaw are as follows:

Legend range series -

136, 236, 124, 136LB, V136LB, 136XLB, V136, V236

Legend broiler series -

136W36, V136W36

Deluxe griddle series -

DG2424, DG2436, DG2448, DG2460, DG2472

Grizzly range series -

G16,G26,G160,G016,G1616,G1626,G2616,G260,G026,G60,VG2626,G26V26,
VG26G26,VG1626,VG2616,VG260, VG026, VG60, VG60L, VG60R, G2616LB, G1626LB,
G2626LB

Montague products manufactured and/or serviced during the period of February 2003 through August 2004 may have a TS-11 valve affected by the voluntary recall. If the model and/or model prefix of the Montague product in question is listed above and the TS-11 valve contained within has the date code within the range of 0306 through and including 0436, please call 1-800-232-9389 to arrange for a repair or replacement through the Robertshaw Controls Company a division of Invensys or email ts11recall@robertshaw.com. Additional information can be found on the Robertshaw website at www.robertshaw.com.
